

Expertise you can trust

The Centre for Joint and Sport Surgery at the Pyramid Clinic at the Lake in Zurich Switzerland specialises in the highest standard of minimally invasive and soft tissue-oriented joint surgery.

The Pyramid Clinic at the Lake is an exquisite private clinic. Medical excellence, personal care and attention, a unique atmosphere and the location right by the lake are the hallmarks of our clinic. We deliver the highest standard of care and personal attention to every patient seeking our help.

Our centre has been pioneering in knee arthroscopy and rehabilitation. For years in our clinic we have been treating athletes with success.

Gentle operating techniques and rapid mobility

We all have an indisputable, basic human need to be active and pain-free throughout our lives. Maintaining our physical well-being means a high quality of life and retaining mobility and independence.

In the course of a lifetime there may be many causes for the impairment of musculoskeletal conditions: in active young people, they are often caused by sports injuries. In the later years they may be due to illness, accidents or wear and tear of the joints (arthrosis).

Independent, whether you are an injured professional athlete or just want to be able to walk again, we will do our best to help you achieving your goal. We

have many years of experience in this field and are internationally renowned. The motto at our Centre for Joint and Sport Surgery is: your mobility lies close to our heart. We always aim to offer you individually the most effective but gentle, leading-edge treatment techniques with the minimum of pain and a speedy recovery. Since physical rehabilitation is an integral part of a successful recovery our treatment team includes specially trained physiotherapists who carry out individual follow-up treatment programs in consultation with the surgeon. The end goal is to achieve optimum recovery as soon as possible. Outstanding results can be achieved only if we work together.

In addition

Our Center for Joint and Sport Surgery offers you: • Uniqueness, flexibility and outstanding hospitality • Safety, security, anonymity and discretion • Compassion, warmth and a pleasant environment • Personalised, individual care and advice • State-of-the-art medicine and physiotherapy

Our treatment spectrum

Our work at the Centre for Joint and Sport Surgery is varied and extensive. The spectrum of therapies and operative procedures includes: trauma and orthopedic surgery; endoprosthesis (artificial joints); as well as hand and foot surgery. Therefore, if surgery is needed we treat injuries to, and chronic

“We deliver the highest standard of care and personal attention to every patient seeking our help”

diseases of the knee, ankle, foot, hip, shoulder, elbow and hand. If surgery is recommended the individual operative plan, as well as recovery process, is thoroughly explained. We are equipped with the most advanced instrumentation, implants and products to individually treat the patient's injury. We constantly strive to optimize our range of services and products for your benefit, be it new implants or products, or sophisticated surgical techniques.

All this aims to remedy an injured or suffering person with joint problems back to normal as quickly as possible.

Caring for your well-being

Warm personal attention and respect for the individual is given the highest priority. The Pyramid Clinic at the Lake not only provides medical services of the highest level, but it also offers superior infrastructures, excellent hospitality and facilities, as well as a warm atmosphere - all designed to make your stay as pleasant and as relaxing as possible.

Specialists with extensive experience

The Centre for Joint and Sports Surgery has performed minimally invasive and soft tissue-oriented surgery for many years with great success. Knowing the negative consequences of postponing treatment for acute and chronic pain in the musculoskeletal system, we assure timely, professional consultation and treatment without delay.

Let us help you with our extensive knowledge to a pain free walk again.
